

NICOTINE SAFETY INFORMATION

Nicotine is classed as a poison in its pure form and we are required to supply advice and warnings with this product.

CAUTION

- **Keep out of the reach of children and pets**
- **Only for use in electronic cigarettes**
- **Seek medical advice if you feel unwell**
- **Refer to device manufacturer for refilling instructions**

LITHIUM BATTERY SAFETY INFORMATION

Crème de Vape only supply batteries and chargers that adhere to UK and EU safety regulations. However all e-cig users should be aware that lithium batteries can provide extremely high currents and can discharge very rapidly when short-circuited. Although this is useful for our application, a too-rapid discharge of a lithium battery can result in overheating of the battery, rupture, and even explosion. If you feel excessive heat any time whilst using your device, STOP using it. Remove the atomiser, and the battery if it is a device with a removable battery. Visually inspect your equipment, every time you use it, and if you see any kind of alteration, or swelling or damage, no matter how small, to your batteries or their wrapper, STOP using them!

- **DO NOT heat, incinerate or reverse polarity**
- **DO NOT over-charge or over-discharge**
- **ALWAYS use the correct charger for the batteries**
- **DO NOT use unprotected li-ion batteries**
- **NEVER leave batteries unattended when charging**
- **DO NOT charge batteries on a combustible surface**
- **REMOVE batteries from the charger immediately after the light turns green**
- **Discontinue using any battery if it fails to retain a charge or if it looks damaged or altered in any way**
- **Please dispose of safely, and according to local regulations**
